Evidence to Action Brief: Transitioning to Adult Care: Supporting Youth with

Special Health Care Needs

THE TOOLKIT

- This toolkit provides the following materials to assist you in disseminating the findings of this research to your networks:
 - Suggested tweets sharing our Evidence to Action brief (slide 3)
 - Suggested tweets sharing the Policy Brief (slide 4)
 - Suggested tweets sharing the PolicyLab blog post on the research (slide 5)
 - Suggested tweets to accompany downloadable PolicyLab images to share in social media posts (slides 6 - 11)
 - Suggested tweets about PolicyLab (slide 12)
- Graphics no longer affect Twitter's character limits and can be included with all suggested tweets. Feel free to tag PolicyLab in images by clicking the "Who's In This Photo?" button before you send a tweet with an image.
- Do not hesitate to contact Lauren Walens (WalensL@email.chop.edu)
 if you have any questions about these materials.

SUGGESTED TWEETS FOR POLICYLAB EVIDENCE TO ACTION BRIEF

Transitioning to adult #healthcare is daunting, especially for youth with complex health needs. PolicyLab research: http://bit.ly/E2A TransitionsOfCare

How can we improve the transition from pediatric to adult health care for youth w/special health needs? New brief: http://bit.ly/E2A_TransitionsOfCare

What barriers did you face when you switched from your pediatrician to an adult provider? @PolicyLabCHOP report: http://bit.ly/E2A_TransitionsOfCare

.@sophiestream explores how to tackle the barriers that #youth w/ complex needs face when switching to adult care: http://bit.ly/E2A TransitionsOfCare

What policy changes can help youth w/ special health care needs transition into adult care? @PolicyLabCHOP research: http://bit.ly/E2A TransitionsOfCare

@PolicyLabCHOP bridges research and policy in a new Evidence to Action brief on transitioning into adult care: http://bit.ly/E2A TransitionsOfCare

SUGGESTED TWEETS FOR POLICYLAB POLICY BRIEF

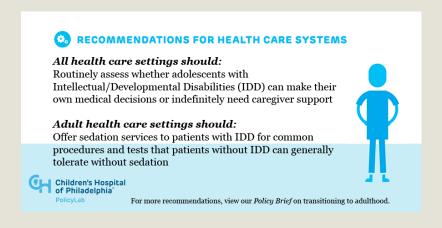

Policy recommendations in this @PolicyLabCHOP brief could have helped Eugene, a vibrant man w/ complex health needs http://bit.ly/PolicyBrief_TransitioningToAdulthoodIDD

Navigating the healthcare system when a patient w/ an intellectual disability turns 21 is very difficult. Policy brief: http://bit.ly/PolicyBrief_TransitioningToAdulthoodIDD

How can policymakers help youth w/ complex medical needs transition to adult care? A @PolicyLabCHOP brief discusses: http://bit.ly/PolicyBrief_TransitioningToAdulthoodIDD

Policymakers can support health systems & providers in offering the best possible care to those w/ #IDD. Learn more: http://bit.ly/PolicyBrief TransitioningToAdulthoodIDD

SUGGESTED TWEETS FOR POLICYLAB BLOG POST HIGHLIGHTING ONE ADOLESCENT'S JOURNEY

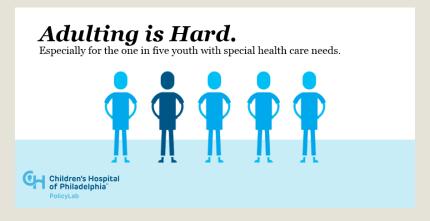

How can we improve the transition from pediatric to adult health care for youth w/ special health needs? Blog post: http://bit.ly/Blog TransitionsOfCare

Entering adult care can be daunting for the 4 million adolescents w/ special #healthcare needs. @PolicyLabCHOP blog: http://bit.ly/Blog_TransitionsOfCare

Without changes to transition practices, patients will still flounder b/w pediatric & adult life. @PolicyLabCHOP: http://bit.ly/Blog_TransitionsOfCare

A @PolicyLabCHOP blog post discusses programs that help youth w/ special health care needs transition to adult care: http://bit.ly/Blog_TransitionsOfCare

Youth w/ complex medical needs are often unprepared to take on the responsibilities of adult care. @PolicyLabCHOP: http://bit.ly/Blog_TransitionsOfCare

SUGGESTED TWEETS FOR POLICYLAB INFOGRAPHICS (JOHN'S STORY)

Download this image here: http://policylab.chop.edu/file/johns-storyjpeg

Policy recommendations from this @PolicyLabCHOP brief could have helped John's transition to adult care. Learn more: http://bit.ly/E2A_TransitionsOfCare

John's story is familiar to many youth w/ complex medical needs transitioning to adult care. @PolicyLabCHOP brief: http://bit.ly/E2A TransitionsOfCare

Poor care coordination led to unnecessary testing and a huge headache for John's mother. @PolicyLabCHOP research: http://bit.ly/E2A TransitionsOfCare

Patients like John face many barriers when transitioning into adult care.

@PolicyLabCHOP provides solutions:
http://bit.ly/E2A TransitionsOfCare

JOHN'S STORY: TRANSITIONING FROM PEDIATRIC TO ADULT CARE

JOHN IS 23 YEARS OLD AND LIVES WITH DOWN SYNDROME, SLEEP APNEA, HEARING LOSS, HIGH CHOLESTEROL, ADHD, OBSESSIVE COMPULSIVE DISORDER, DEPRESSION AND A HISTORY OF OTHER MEDICAL ISSUES.

He continues to require multiple specialists in addition to a primary care doctor to manage his ongoing medical needs. Although he is an adult, he still sees a pediatrician and mostly pediatric specialty providers because his mom has been unable to get help in identifying adult providers who feel equipped to provide his care. Although she managed to find an adult sleep physician, John's mom is usually told that the adult providers who participate with their insurance are not accepting new patients or do

not have experience caring for individuals with Down syndrome. Therefore, John's care has become extremely fragmented. His mom must coordinate this complicated network of care on her own, and faces not only additional demands on her time and resources, but also an increased sense of responsibility to monitor her son's conditions and determine whether he requires medical attention At times, this has led to unnecessary testing or lab work because there is no coordination around holistic care.

SUGGESTED TWEETS FOR POLICYLAB INFOGRAPHICS (COMPLEX WEB OF COMMUNICATION)

Download this image here: http://policylab.chop.edu/file/complex-web-communicationjpeg

This complex web of communication illustrates Michael's experience coordinating care across multiple systems. Brief: http://bit.ly/E2A TransitionsOfCare

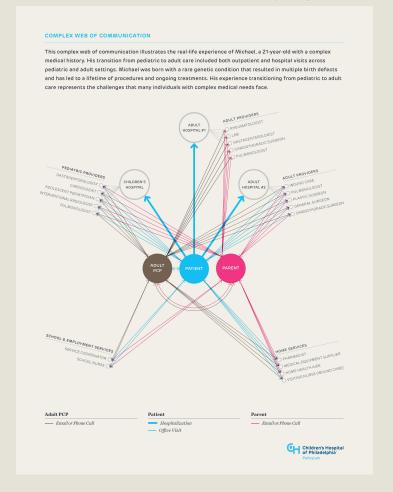

Michael's experience represents the challenges faced by many patients with complex medical needs. Learn more: http://bit.ly/E2A TransitionsOfCare

Many office visits, calls & emails create a complex web of communication for patients & providers. PolicyLab brief: http://bit.ly/E2A TransitionsOfCare

It takes lots of time to coordinate the care that youth w/ complex medical needs receive.

SUGGESTED TWEETS FOR POLICYLAB INFOGRAPHICS (GOT TRANSITION SIX CORE ELEMENTS)

Download this image here: http://policylab.chop.edu/file/got-transition-six-core-elements/jpeg

.@GotTransition2 created six core elements to guide the transition to adult health care systems. PolicyLab research:

http://bit.ly/E2A_TransitionsOfCare

.@GotTransition2's six core elements guide the #transition process from pediatric to adult health care. New brief:

http://bit.ly/E2A TransitionsOfCare

A @PolicyLabCHOP study found that many providers are not following @GotTransition2's Six Core Elements. Learn more:

http://bit.ly/E2A TransitionsOfCare

Mapping out a plan helps youth w/ special health care needs transition from pediatric to adult health care. Brief:

http://bit.ly/E2A TransitionsOfCare

TRANSITION PLANNING.

Recognizing the challenges that youth with special health care needs face as they transition out of pediatric care, the Maternal and Child Health Bureau—part of the U.S. Department of Health and Human Services' Health Resources and Services Administration—and The National Alliance to Advance Adolescent Health formed a cooperative agreement called Got Transition in 2005. This collaborative aimed to break down these barriers through innovative strategies for health professionals, youth

A SYSTEM OF TRANSITION TRACKING

TRANSFER OF CARE.

ASSESSMENT OF TRANSITION READINESS

TRANSITION COMPLETION.

SUGGESTED TWEETS FOR POLICYLAB INFOGRAPHICS (EPSDT AND SCHOOL SERVICES CLIFF)

Download this image here: http://policylab.chop.edu/file/epsdt-and-school-services-cliffipeg-0

Young adults with special health care needs lose many #Medicaid services at age 21. New @PolicyLabCHOP brief:

http://bit.ly/E2A TransitionsOfCare

When youth with special #healthcare needs turn 21, what happens to their benefits?

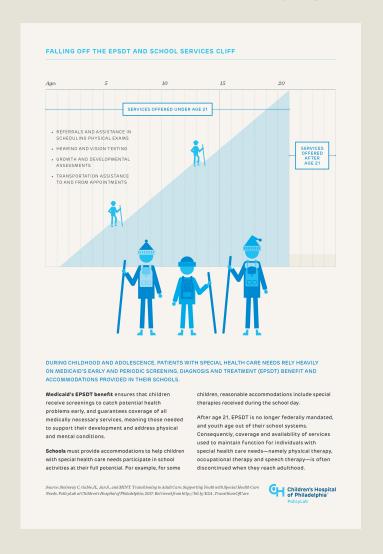

@PolicyLabCHOP research explores:
http://bit.ly/E2A TransitionsOfCare

After age 21, youth with special #healthcare needs lose benefits like #EPSDT and school services. PolicyLab brief:

http://bit.ly/E2A_TransitionsOfCare

How can we help patients who fall off the #EPSDT and school services cliff at age 21? New PolicyLab brief discusses:

http://bit.ly/E2A_TransitionsOfCare

SUGGESTED TWEETS FOR POLICYLAB INFOGRAPHICS (ADULT PROVIDER OPINIONS)

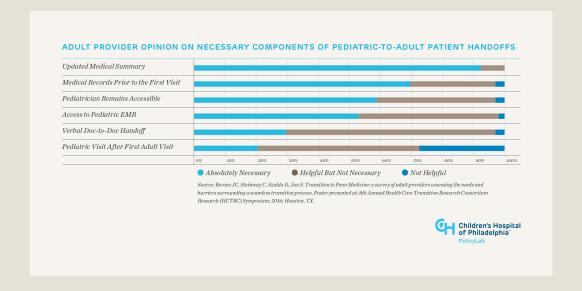

Download this image here:

http://policylab.chop.edu/file/provider-opinion-necessary-componentsjpeg

Most adult providers in a PolicyLab study reported huge challenges to caring for new young patients w/ complex needs http://bit.ly/E2A_TransitionsOfCare

Though it's helpful, many adult providers don't receive an updated medical summary from a patient's #pediatrician: http://bit.ly/E2A TransitionsOfCare

Adult doctors have varying beliefs on the key elements of the pediatric-to-adult handoff. @PolicyLabCHOP brief: http://bit.ly/E2A_TransitionsOfCare

SUGGESTED TWEETS ABOUT POLICYLAB

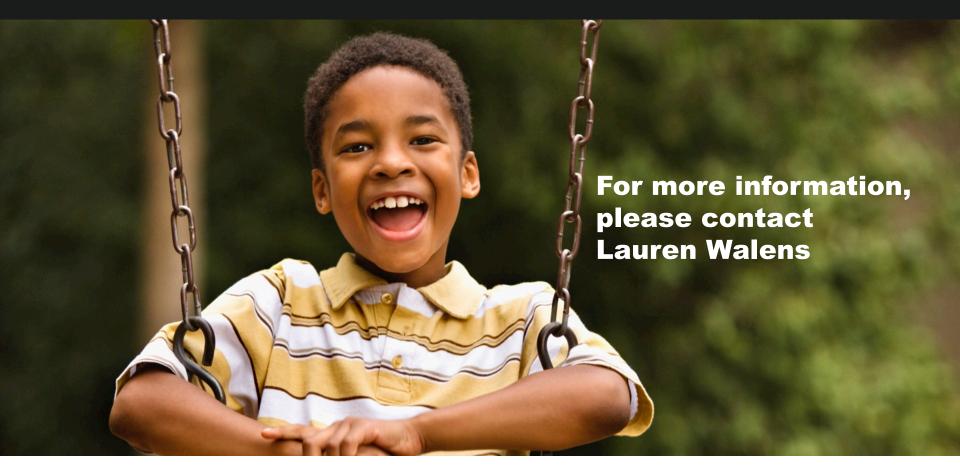

Learn more about @PolicyLabCHOP's efforts to inform practice & policy to improve child & family health http://policylab.chop.edu/

Learn how @PolicyLabCHOP is improving & ensuring insurance coverage, #healthequity & overall #familyhealth http://policylab.chop.edu/
