

Gender and Sexuality Development Clinic Annual Update 2019

Date:

Mar 2020

The [Gender & Sexuality Development Clinic](#) (GSDC) was founded in January 2014 and with our exciting growth over the last few years we are pleased to share with you our fourth Annual Update. The clinic team provides medical care and psychosocial support for transgender and gender expansive children and adolescents and their families. The GSDC is a collaboration among the Divisions of Adolescent Medicine and Endocrinology, and the Departments of Behavioral Health, Social Work and Family Services at Children's Hospital of Philadelphia. Now in its sixth year, the clinic has served nearly 1,400 youth and their families from our local community and across the globe. While our first priority will always be to deliver the highest quality, state-of-the-art care to our patients, we are pleased to also highlight other important areas of focus for the clinic.
