Welcome to the **Project: ACE-IT Rapid Test Data Reporting System!**

You have received this email because your district is participating in a school-based COVID rapid antigen testing program. Education and health department leadership in your county have been engaging in ongoing discussions about how best to implement COVID-19 testing in schools so that staff, students, and communities may stay safe while working and learning in-person.

We have partnered with a Texas-based non-profit that has developed an app and has contracted with the PA Dept. of Health for secure COVID results data reporting to governing authorities as required by law. By following the instructions below, you will be able to practice data entry in real-time during the training so that you can become comfortable with the process.

You now have the ability to become a BinaxNOW test administrator; but by setting up an account, you are not necessarily committing to it. To complete this process, you will undergo a brief certification program, which will be discussed during training. Please contact your local health department lead for details.

Click here to set your password the first time. Click "Forgot Password or First Login?", submit your email, and then you will receive a password reset email.

App URL: https://app.pennrapidtest.org/
Test Administrator Email: eisenm@chop.edu
Phone number on file: (267) 977-9693

If you believe you have received this email in error, please contact your county Intermediate Unit.

For further information, please contact Maggie Eisen: eisenm@email.chop.edu.

If you need technical assistance with the app please contact support@pennrapidtest.org.

This app was originally developed for a program in Texas, so you may see references to Texas on some webpages or training materials until the program has been fully migrated to Southeastern PA.
