

Project: ACE-IT
Assisting Childhood Education through Increased Testing

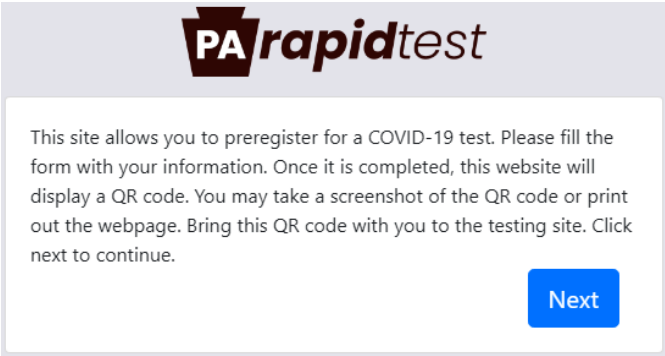

Want to speed up the process?

Make a QR Test Code for yourself or your child before coming to a testing event

How to:

1. Click <https://register.pennrapidtest.org/> or enter this url into your web browser (the app is not compatible with Internet Explorer but should work on most other web browsers).
2. Follow instructions on your screen, which include answering questions about your (child's) demographic info. to create a personalized QR code.

Screen #1:

Screen #2:

This is the second screen of the registration process, which is a form for entering demographic information. It features the 'PA rapidtest' logo at the top. The form includes several input fields: "First Name", "Last Name", "Date of Birth" (with a placeholder "YYYY-MM-DD"), "Age" (with a dropdown menu set to "Calculated automatically"), "Sex" (with a dropdown menu), "Race" (with a dropdown menu), "Ethnicity" (with a dropdown menu), "Email", "Cell Phone" (with a placeholder "000-000-0000"), and "Personal Identifier" (with a red circle icon). There are also two buttons: a red "Clear" button at the top left and a blue "Next" button at the bottom right. A "Help" button with a progress indicator showing "1" of "2" steps is located at the top right.

Screen #3:

PA rapidtest

Back Help 1 2

Address Address Line 2 City

State Zip County

Clear Form Submit

Screen #4:

3. Take a screengrab (photo) of the QR code and store it in your device in your photos app; or, cut/paste the screengrab onto a Word .doc, and print it out.

4. You may create as many personalized QR codes as you wish – each time you create a new one, you'll enter your demographic data; but each time you use that QR code in the PA Rapid Test app at a testing event, your demographic data will pre-populate.

Thank you!
