

## Rapid Antigen Testing Plan

- **5 Phase Approach**
- **2 Week Phases January 25 through March 29**
- **Flexible movement and acceleration between phases within capability limits**
- **Start small and progress to build on each phase as testing availability and District limits allow**
- **Target populations in each phase along with symptomatic students and staff with documented permission**
- **No student or staff member will be tested who arrive at school symptomatic**
- **Testing will occur in the health suite or other suitable location in close proximity to health suite with supervision by the school nurse**
- **BinaxNow Test kits will be stored in health suite following manufacturer recommendations**
- **Staff will register at [register.pennrapidtest.org](http://register.pennrapidtest.org) prior to testing**
- **School nurses will register students in early phases and encourage families to pre-register as phases progress**
- **Assess testing plan weekly and adjust as necessary**
- **Will require Memorandum of Agreement (MOA) with Chester County Health Department and Standing Order for each school testing location**
- **Chester County Health Department will serve as the oversight laboratory for each school building/district testing location**

## ***PHASE 1- Week of January 25 and February 1***

- **Special Education Programs in Life Skills, Autistic Support, Multi-Disability Support K-12 and staff working within the programs (teachers, therapists, psychologists, assistants)**
- **Primos, Hillcrest, Westbrook Park Elementary, Drexel Hill Middle School and Upper Darby High School**
- **Rationale- Less than 6 feet at times, high touch and less compliance with masking**
- **Practice with students with Q-Tips prior to initiating testing**
- **K-3 Symptomatic students and K-12 staff who become symptomatic during the school day and after initial daily screening**

**\*The District may pause here and focus on this phase as testing limits allow or accelerate as determined by weekly check points**

## ***Phase 2- Week of February 8 and 16***

- **Kindergarten students and staff**
- **Rationale- possible high touch and some difficulty with masking could be anticipated**
- **K-3 Symptomatic students and K-12 staff who become symptomatic during the school day and after initial daily screening**

## ***Phase 3- Week of February 22 and March 1***

- **1st Grade students and staff**
- **K-3 Symptomatic students and K-12 staff who become symptomatic during the school day and after initial daily screening**

***Phase 4- Week of March 8 and March 15***

- 2nd Grade students and staff
- K-3 symptomatic students and K-12 staff who become symptomatic during the school day and after initial daily screening

***Phase 5- Week of March 22 and March 29***

- 3rd Grade students and staff
- K-3 symptomatic students and K-12 staff who become symptomatic during the school day and after initial daily screening

**\*Additional target groups of staff members will be the next phase after the initial 5 phases are completed**
